DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Higgins (US 6034358).

Higgins discloses the claimed invention including , *inter alia*, a radiant electric heater comprising a base of thermal and electrical insulation material having a surface supporting at least one electric heating element comprising at least one elongate electrically conductive ribbon, the at least one electrically conductive ribbon being supported on edge; a rod-like temperature-responsive device extending lengthwise partly across the heater from an edge thereof and over the at least one electric heating element the surface of the base being provided with an elongate recess with sloping sides extending beneath and along the length of the rod-like temperature-responsive device, at least one electrically conductive ribbon is supported in and traverses the elongate recess such that an upper edge of the at least one electrically conductive ribbon substantially follows a contour of the surface of the recess.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
